

Divergent Boundary- Continental and Continental Divergence

BY: William Neal

What is Continental and Continental Divergence

Divergent Plate Boundary are locations where plates are moving away from one another

Locations of where they occur

- East Africa:
When Eastern
& Western
branches
divergent
it, made the
Great East
African Rift

Locations where they occur

- Harrat Khaybar:
NASA shows that
the volcanic field
formed by eruptions
along the North/South
linear vent system,
over 5 million
years ago.

Specifics Effects

- Rift Valleys, Volcanoes, and Earthquakes
